Amendments to the Claims

1. *(canceled)*.

2. *(canceled)*

3. *(currently amended)* A process for making a vesicle composition comprising;

I) combining,

A) 2 to 25 wt % of a silicone polyether copolymer having a structure represented by:

where R1 represents an alkyl group containing 1-6 carbon atoms;

R2 represents the group $-(CH_2)_aO(C_2H_4O)_b(C_3H_6O)_cR_3$;

x is 251-1,000; y is 1-500; z is 1-500; a is 3-6; b is 4-20; c is 0-5;

and R3 is hydrogen, a methyl group, or an acyl group.

B) 2 to 30 wt % of a water miscible volatile solvent,

C) water in a sufficient amount to provide the sum of the wt% of A), B), and

C) to equal 100%.

to form an aqueous dispersion of the silicone polyether copolymer,

II) mixing the aqueous dispersion to form a vesicle composition having an average particle size of less than 0.500 micrometers,

III) optionally, removing the water miscible volatile solvent from the vesicle composition.

4. *(Original)* The vesicle composition produced by the process of claim 3.

5. *(canceled)*

6. *(canceled)*

7. *(previously presented)* The vesicle composition of claim 4 further comprising a personal, household, or healthcare active ingredient.

8. *(currently presented)* A personal, household, and healthcare composition comprising the vesicle composition of claim 35.

9. *(previously presented)* A personal, household, and healthcare composition comprising the vesicle composition of claim 7.
